

OUR WORK ADVANCES COMPLEX, ESSENTIAL OPERATIONS THAT PROTECT OUR NATION, CONNECT OUR WORLD AND EXPLORE OUR UNIVERSE.

APEX Space & Defense Systems delivers world-class, lightweight, durable solutions for the space, defense and mission-critical infrastructure industries. Our team unites three expert business units, each with more than 40 years of experience in composite manufacturing: Advanced Composite Products & Technology (ACPT), All American Racers (AAR) and Unitech Composites (Unitech). Each is among a small group of pioneers in this industry, who continue to lead the way in innovative, lightweight and durable material manufacturing solutions.

**YOUR EDGE
WHEN IT MATTERS MOST**

You can count on us for the right capabilities, capacity, certifications, facilities, equipment and team to meet your immediate needs. From design and development through final delivery, we are driven by an intense focus on innovation and quality enabled by our deep commitment to transparency, integrity and partnership.

**MADE RIGHT
THE FIRST TIME**

You can trust APEX for the highest quality of products. Our commitment is on-time, defect-free delivery, while minimizing waste and costs. It's about accountability and continuous improvement in order to increase productivity without sacrificing quality.

SPACE

Our 40+ year legacy in the space industry began in the early days of NASA's Space Shuttle program. We have since grown our expertise and expanded our capabilities to support a wide range of needs. From landing legs and propellant tanks to battery containers and launch tubes, some of the most preeminent names in launch vehicles and satellite programs partner with us on projects that can't fail.

DEFENSE

Supporting our service members is a critical responsibility. These brave men and women demand quality and flawless performance in the field. OEMs and Tier 1 vendors trust APEX as a direct supplier based on our mass production capability and reputation for consistently delivering the highest quality products.

MISSION-CRITICAL INFRASTRUCTURE

From underwater communications systems to autonomous vehicles, we deliver critical components for no-fail missions. Customers depend on our expertise in complex, engineered lamination and winding solutions. They know our systems, equipment and capacity meet the most exacting requirements of finish tolerances, critical speed and strength.
